CBRPong

By Jason Rush

### Required:

CBR (Calculator Based Ranger)

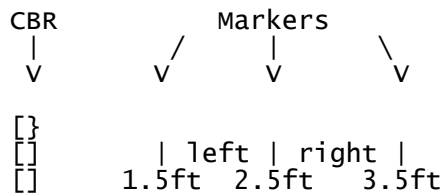

TI-83/4/plus/silver edition - graphing calculator

Cord that should come with the CBR, to connect them...

CBRPong is a version of pong made to be used with a CBR (Calculator Based Ranger).

The game is pretty simple, don't let the ball hit the bottom of the screen.

To get set up for CBRPong, follow the diagram, using straws or something for markers.

To move the paddle, put your hand or something between the corresponding markers, in front of the CBR.

The game doesn't have a high score system or anything, yet, and the game can be edited, I don't mind.

Thanks for trying my game,  
Jason E. Rush
