<p align="center"><READ ME FOR I×O Game Pac 2></p>
<p align="center">(DO NOT REMOVE THIS FILE FROM I×O GAME PAC 2 GAMES)</p>

BALLGAME:	STUPID. Like Random 2, only MUCH MUCH WORSE!

BATTERY:	It charges your Battery! Really! Ok... Maybe not... but it is pretty realistic. Give it too your friends who like wasting your calcs battery power as a little gift.

CHANCE:	Like most of my games with that title. This is the current best of my random number programming abilities

---

COLLECT:	Run through a maze and collect the coins. Don't get hit by the ghost! (Many glitches)

COWS:	Strange snake. Only can move 100 times! To many cheats.

CRAWLING:	Try it! You will only want to play it once.

FLYING:	Also a little strange. Move all over trying not to get hit by the flying blocks.

FUNGAME:	Run around collecting +'s. Don't run into the wall. A little guy chases you.

GLOBE21:	Game chooses your nationality. You run to the exits to move to next level. Press "MODE" at main screen to exit.

JUNK.zip:	Tons of stupid programs I started but just left... Now its up to you to finish them...

MATH:	Makes solving Pythagorean Theorem, area, ETC. easier. Algebraic equation solver coming soon.

MONEY:	You have a $500 debt to pay. Harvest money off of trees. WARNING: Disasters may ruin your plans.

MONEY2:	Same as original, only bug fixes, compiled to my current programming ability (smaller), wprks correctly, better pictures, new features!

RANDOM 2:	(first version reset my calc) Many random # games. Free Casino! If you win, E-MAIL me to tell me to finish it. Because of the 1 in 1,000,000,000 chance of winning, I never programmed it to tell you "You Win!"

STARTUP:	A cool graphical program that you can load (in TI83+) to start at calc startup. Otherwise,

| | | it cleans up your calculator in either a minimal way (everytime) or a maximized calc clean up. |

| | SOCCER: | Soccer player moves back and forth. Try to score a goal. If the goalie blocks it, there is a replay. If you feel like cheating, there can be (sortof) valuable poles to aim for. |

| | ZVIR: | A mutant virus. Pretend you can't just hit the on button. |

| | ZZZ: | A stupid virus. See Zvir. |

Many of my games have cheats. Since I am against other people beating
my high score with out my knowledge, to get the codes, e-mail me at:
<ianolson21@hotmail.com>.   SUBJECT MUST BE: game codes
I WILL <u>NOT</u> OPEN LARGE E-MAILS WITH THE VIRUSES GOING AROUND!
This address has many filters, so make all mail appropriate!!!
Please do not edit or steal my programs without asking me! You can use
or finish any of the programs in "JUNK.zip", just give me some credit!
Please ask me before using my other programs!
Please email me about any bugs you find in my programs.
Visit my website! <http://www.geocities.com/ti83expert> (Completed around 4/1/02)
